CV Transition Plan - Monitoring Final TQ Verification – May 1, 2014

In November 2013, the CV Project Team communicated that it would provide notice when BP GOM would start the transition phase of the Final TQ Verification. The monitoring process for this verification will begin May 1st. All Contractor employees will be checked for a 'qualified' status in ISNworld (ISN) before traveling offshore to work for BP. A non-qualified ISN status will result in the employee being placed on a monthly non-conformance report that will be elevated through BP management.
